APT2012SRCPRV
2.0 x 1.25 mm SMD Chip LED Lamp

DESCRIPTIONS
- The Super Bright Red source color devices are made with Gallium Aluminum Arsenide Red Light Emitting Diode
- Electrostatic discharge and power surge could damage the LEDs
- It is recommended to use a wrist band or anti-electrostatic glove when handling the LEDs
- All devices, equipments and machineries must be electrically grounded

FEATURES
- 2.0 mm x 1.25 mm SMD LED, 0.75 mm thickness
- Low power consumption
- Wide viewing angle
- Ideal for backlight and indicator
- Package: 2000 pcs / reel
- Moisture sensitivity level: 3
- Halogen-free
- RoHS compliant

APPLICATIONS
- Backlight
- Status indicator
- Home and smart appliances
- Wearable and portable devices
- Healthcare applications

ATTENTION
Observe precautions for handling electrostatic discharge sensitive devices

PACKAGE DIMENSIONS

RECOMMENDED SOLDERING PATTERN (units : mm; tolerance : ± 0.1)

SELECTED SOLDERING PATTERN (units : mm; tolerance : ± 0.1)

Notes:
1. θ1/2 is the angle from optical centerline where the luminous intensity is 1/2 of the optical peak value.
2. Luminous intensity / luminous flux: ±15%.
3. Luminous intensity value is traceable to CIE127-2007 standards.
4. The specifications, characteristics and technical data described in the datasheet are subject to change without prior notice.
5. The device has a single mounting surface. The device must be mounted according to the specifications.

<td>-</td>
<td>mV/(^°)C</td>
</tr>
</tbody>
</table>

Notes:
1. The dominant wavelength (\( \lambda_d \)) above is the setup value of the sorting machine. (Tolerance \( \lambda_d \): \pm 1nm.)
2. Forward voltage: \pm 0.1V.
3. Wavelength value is traceable to CIE127:2007 standards.
4. Excess driving current and/or operating temperature higher than recommended conditions may result in severe light degradation or premature failure.

### ABSOLUTE MAXIMUM RATINGS at \( T_A = 25°C \)

<td>410</td>
<td>°C/W</td>
</tr>
</tbody>
</table>

Notes:
1. 1/10 Duty Cycle, 0.1ms Pulse Width.
2. \( R_{\text{th JA}}, R_{\text{th JS}} \) Results from mounting on PC board FR4 (pad size \geq 16 mm\(^2\) per pad).
3. Relative humidity levels maintained between 40% and 60% in production area are recommended to avoid the build-up of static electricity – Ref JEDEC/JESD625-A and JEDEC/J-STD-033.

Forward Current Derating Curve

Luminous Intensity vs. Ambient Temperature

SUPER BRIGHT RED

Notes:
1. Don’t cause stress to the LEDs while it is exposed to high temperature.
2. The maximum number of reflow soldering passes is 2 times.
3. Reflow soldering is recommended. Other soldering methods are not recommended as they might cause damage to the product.
PACKING & LABEL SPECIFICATIONS

PRECAUTIONARY NOTES

1. The information included in this document reflects representative usage scenarios and is intended for technical reference only.
2. The part number, type, and specifications mentioned in this document are subject to future change and improvement without notice. Before production usage customer should refer to the latest datasheet for the updated specifications.
3. When using the products referenced in this document, please make sure the product is being operated within the environmental and electrical limits specified in the datasheet. If customer usage exceeds the specified limits, Kingbright will not be responsible for any subsequent issues.
4. The information in this document applies to typical usage in consumer electronics applications. If customer’s application has special reliability requirements or have life-threatening liabilities, such as automotive or medical usage, please consult with Kingbright representative for further assistance.
5. The contents and information of this document may not be reproduced or re-transmitted without permission by Kingbright.
6. All design applications should refer to Kingbright application notes available at https://www.KingbrightUSA.com/ApplicationNotes
